

# THE CUTTING EDGE

AN INFORMATION TECHNOLOGY NEWSLETTER FOR THE UNIVERSITY OF MIAMI COMMUNITY

February 2002

<http://www.miami.edu/cutting-edge>

## Dr. Temares Named One of Business World's Top 100 Information Technology Leaders

M. Lewis Temares, Ph.D., vice president for information technology and dean of the college of engineering at the University of Miami, has been named by Computerworld Magazine one of the business world's Premier 100 IT Leaders. The award honors individuals who have had a positive impact on their organizations through technology.

Now in its third year, the Premier 100 IT Leaders award is recognizing Temares for exceptional technology leadership, innovative approaches to business challenges, and effective execution of comprehensive IT strategies. He will be honored at a March conference in California.

Temares was selected from hundreds of nominees who most closely matched Computerworld's Leadership Index, a set of characteristics that describes those executives who guide the effective use of IT in their organizations. Honorees include executives from The Bank of New York, Hewlett Packard, Staples, and FedEx Corporation. Only three other award winners are from Florida: IT leaders at Office Depot, Royal Caribbean Cruise Lines, and Walt Disney World. Only one other IT leader in U.S. higher education made the list.

The complete list of Premier 100 IT Leaders can be found in the January 2, 2002 issue of IDG's *Computerworld* and online at [www.computerworld.com](http://www.computerworld.com). The issue includes extensive feature articles summarizing the challenges IT Leaders expect to face in the coming year including CRM, next-generation desktops, ROI and Security.

## New Dates for Project 2000 Classes

The NGJ Information Systems Institute will again offer Project 2000 classes on Monday, February 11 and Monday, March 4 on the Coral Gables Campus. The one-day class covers not only the basics of the program but also emphasizes the reporting functions of this popular package. Registration is available by calling 305-284-2100 or email to: [szabowski@miami.edu](mailto:szabowski@miami.edu).

## Flexible Forms Online

Flexible Spending Medical and Dependent Care Accounts forms can be found online by visiting [www.miami.edu/benefits/forms/](http://www.miami.edu/benefits/forms/). The 2002 claim reimbursement forms must be submitted for reimbursement to: CoreSource 6100 Fairview Road, Suite 1000, Charlotte, NC 28210. (The address will be on the claim form.) Forms are also available through the Fax Warehouse, 305-284-1983. For questions on your flexible spending accounts, contact CoreSource at 1-800-327-5462, ext. 7494.

## InfoEd Goes Live!

This month IT began production use of the InfoEd sponsored proposals tracking module. This software will allow central office staff to input proposals for sponsored research, which will then be sent to the legacy FRS system. This is "foundation" software that will continue to grow with other components added over the following months. The goal is to create an Electronic Research environment, where faculty and researchers will enter their own proposal data, have it routed through an approval process, assure all necessary protocols are in place, and finally have it electronically submitted to the sponsoring agency. The software is part of the InfoOffice suite, provided by InfoEd, who is not a stranger to the University of Miami community. The "Genius" and "Smarts" software have been in use here for several years. More information can be obtained at [www.miami.edu/research](http://www.miami.edu/research).

## FAQ: Faculty Asked Questions

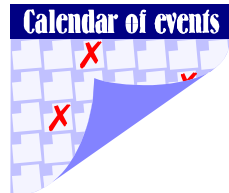

Professor S. asks: Where do I find information about technology or Telecommunications services?

The Information Technology and Telecommunications User's Guide for 2002 is a great place to start. The new combined User's Guide will be released in February 2002. This guide is intended to make it easier for an individual to understand and utilize the services that Information Technology and Telecommunications offer. It includes a staff directory, sections on the different groups within Information Technology, the services we provide, and who to contact for assistance. We suggest you keep this guide handy as a reference source. Those needing an extra copy of the new User's Guide may obtain one for free from Ungar 103A or may reference the Web version at [www.it.miami.edu/pubs/usersguide/guide.html](http://www.it.miami.edu/pubs/usersguide/guide.html).

## UM launches new calendar

Want to know what's going on around campus? Go to the 'Canes Calendar at [www.miami.edu/calendar](http://www.miami.edu/calendar) to get the latest information on events at the University. You can search by audience, category, location, or keyword, or just browse through. In addition, you can gain access to put your events on the calendar by going to [www.miami.edu/web/calendar](http://www.miami.edu/web/calendar).

Please send corrections or suggestions for future issues of "The Cutting Edge" to:  
Ms. Ann Helmers, Editor,  
University of Miami, Information Technology,  
Coral Gables, FL 33124-4220  
Or e-mail to [ahelmerts@miami.edu](mailto:ahelmerts@miami.edu)
